

Website Page Revision Points

Please make the following changes to the website page:

1. Change Website Font

- Please update the website font and use a cleaner, more professional, and modern font style suitable for a creative graphic design/video editing company.

2. Update Theme Colors

- Our company theme colors are:
 - **Dark Navy Blue:** #001941 or #13305a
 - **Orange:** #e77c24
- Please replace the current black and orange color combination with our official dark navy blue and orange theme colors across the website.

3. Fix Text Visibility and Layout Issues

- The text on the layout is appearing under the icons in some sections.
- Because of this, the text is not properly visible.
- Please fix the text positioning, spacing, and alignment.
- This issue is appearing across the overall page, so please check the complete page carefully.

4. Fix "What We Do" Section

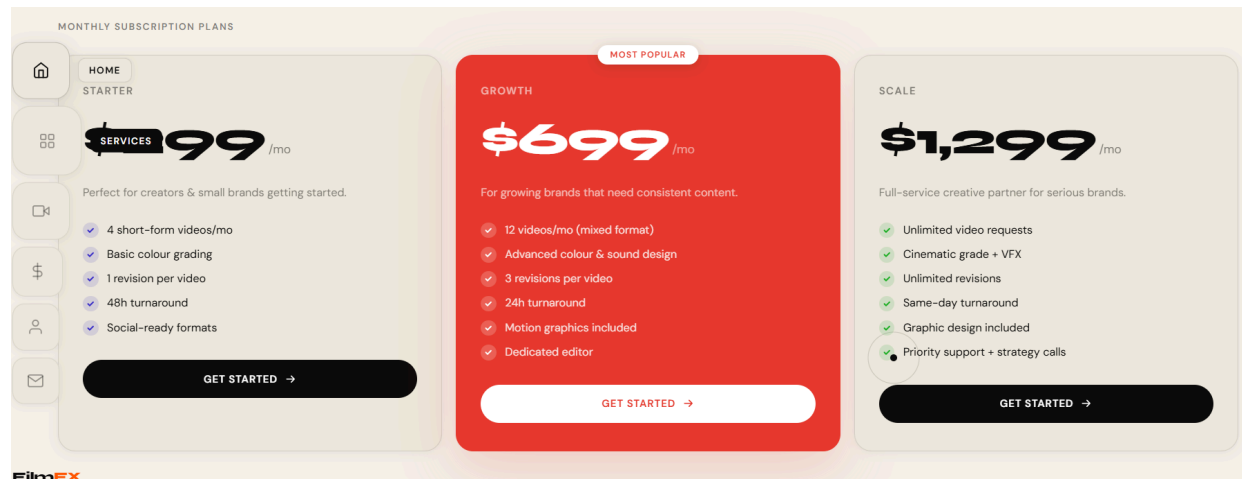

- In the "What We Do" section, the images inside the bright color boxes are getting cut.

- Please adjust the images properly so they fit inside the boxes without cropping or cutting.

5. Remove or Redesign Pricing Plan Section

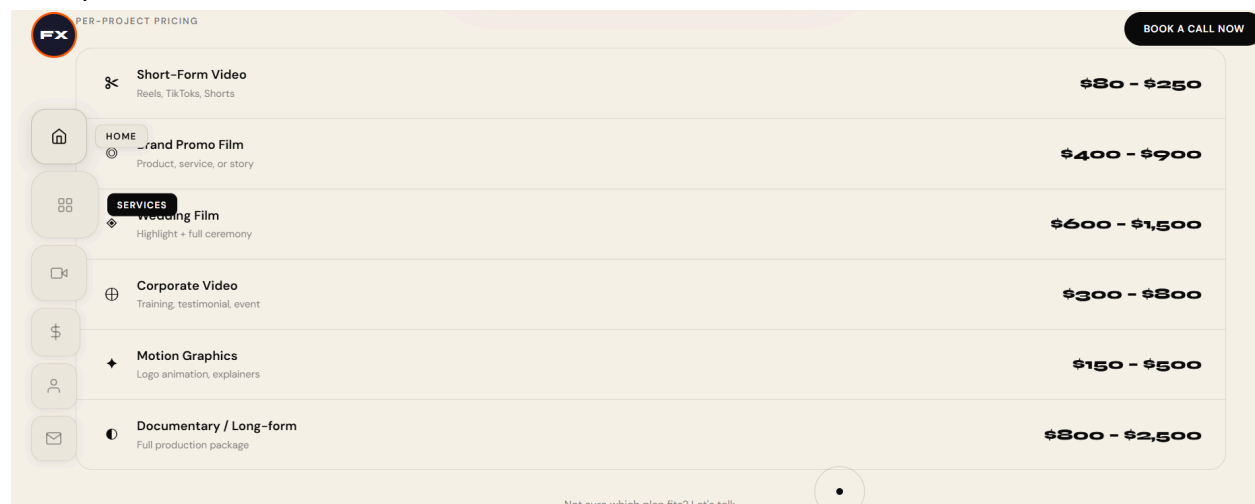

- We did not ask for a pricing plan section and we did not provide any pricing details.
- The current pricing plan section is taking too much width and looks very heavy/bulky.
- Please either remove this section or redesign it in a clean and professional way after confirmation.

6. Fix Per Project Pricing Layout

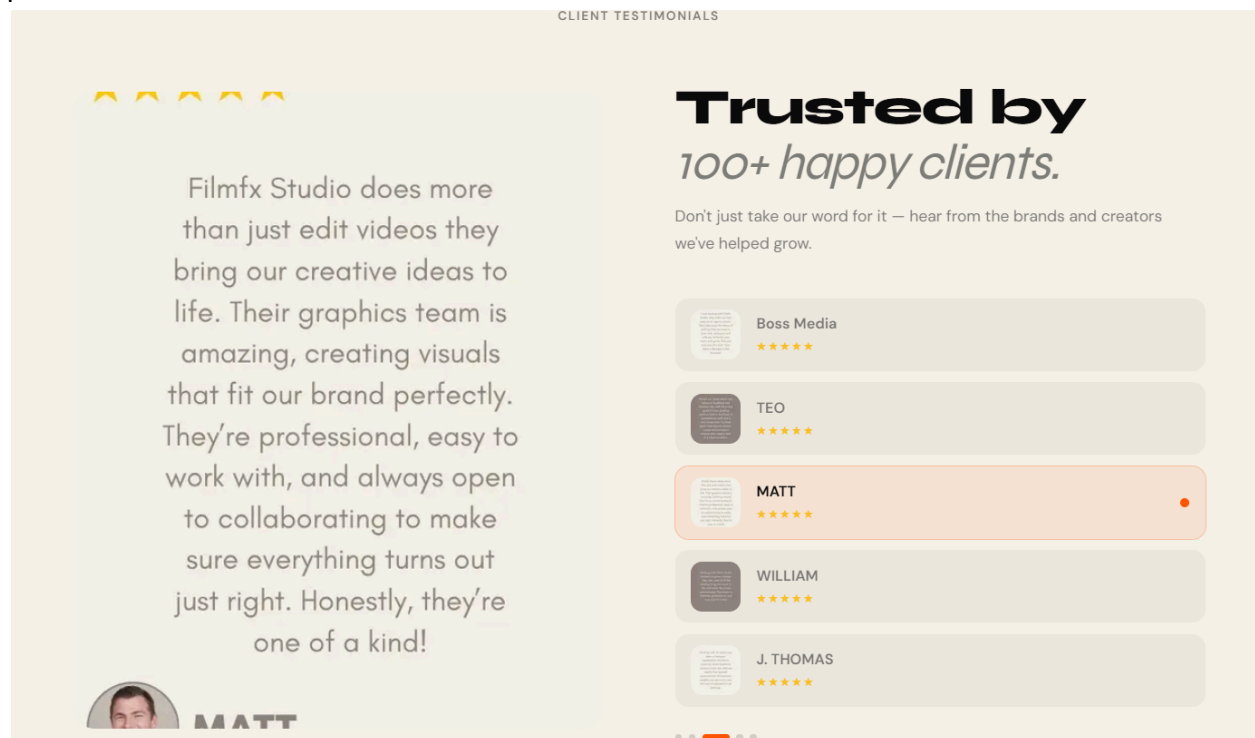

- The “Per Project Pricing” section looks too simple.
- The text has too much spacing and appears very far apart.
- The alignment also does not look proper.

- Please improve the layout, spacing, typography, and alignment to make it look more professional.

7. Fix Testimonials Section

- The testimonials section is not designed the way we wanted.
- Some testimonial content is also getting cut.
- Please redesign or adjust this section so it looks clean, readable, and professional.

8. Improve Overall Professional Look

- The current page does not look fully professional.
- Please improve the overall design, spacing, alignment, colors, typography, and section consistency.

- The page should look modern, premium, creative, and suitable for our company branding.

9. Replace Existing Posts/Images

- There are many posts/images on the page that we need to replace.
- Please keep the layout flexible so we can easily replace those posts with our updated designs.
- I will send you the posts that need to be replaced soon.

10. Complete Page Review

- Please review the full page from top to bottom.
- Fix all visual issues including alignment, spacing, text visibility, image cropping, section width, and responsiveness.
